

# Sparse Reward

Hung-yi Lee

# Sparse Reward

## Reward Shaping

# Reward Shaping

為machine 示範action，引導學習

(更改真實的reward，引導machine做到我們希望他做的事情)

# Reward assigned by Developer

Parameters	Description	FlatMap	CIGTrack1
living 活著扣分	Penalize agent who just lives	-0.008 / action	
health_loss 掉血就扣分	Penalize health decrement	-0.05 / unit	
ammo_loss 減少彈藥扣分	Penalize ammunition decrement	-0.04 / unit	
health_pickup 補給包加分	Reward for medkit pickup	0.04 / unit	
ammo_pickup	Reward for ammunition pickup	0.15 / unit	
dist_penalty idle扣分	Penalize the agent when it stays	-0.03 / action	
dist_reward 移動加分	Reward the agent when it moves	9e-5 / unit distance	

Get reward,  
when closer  
Need domain  
knowledge

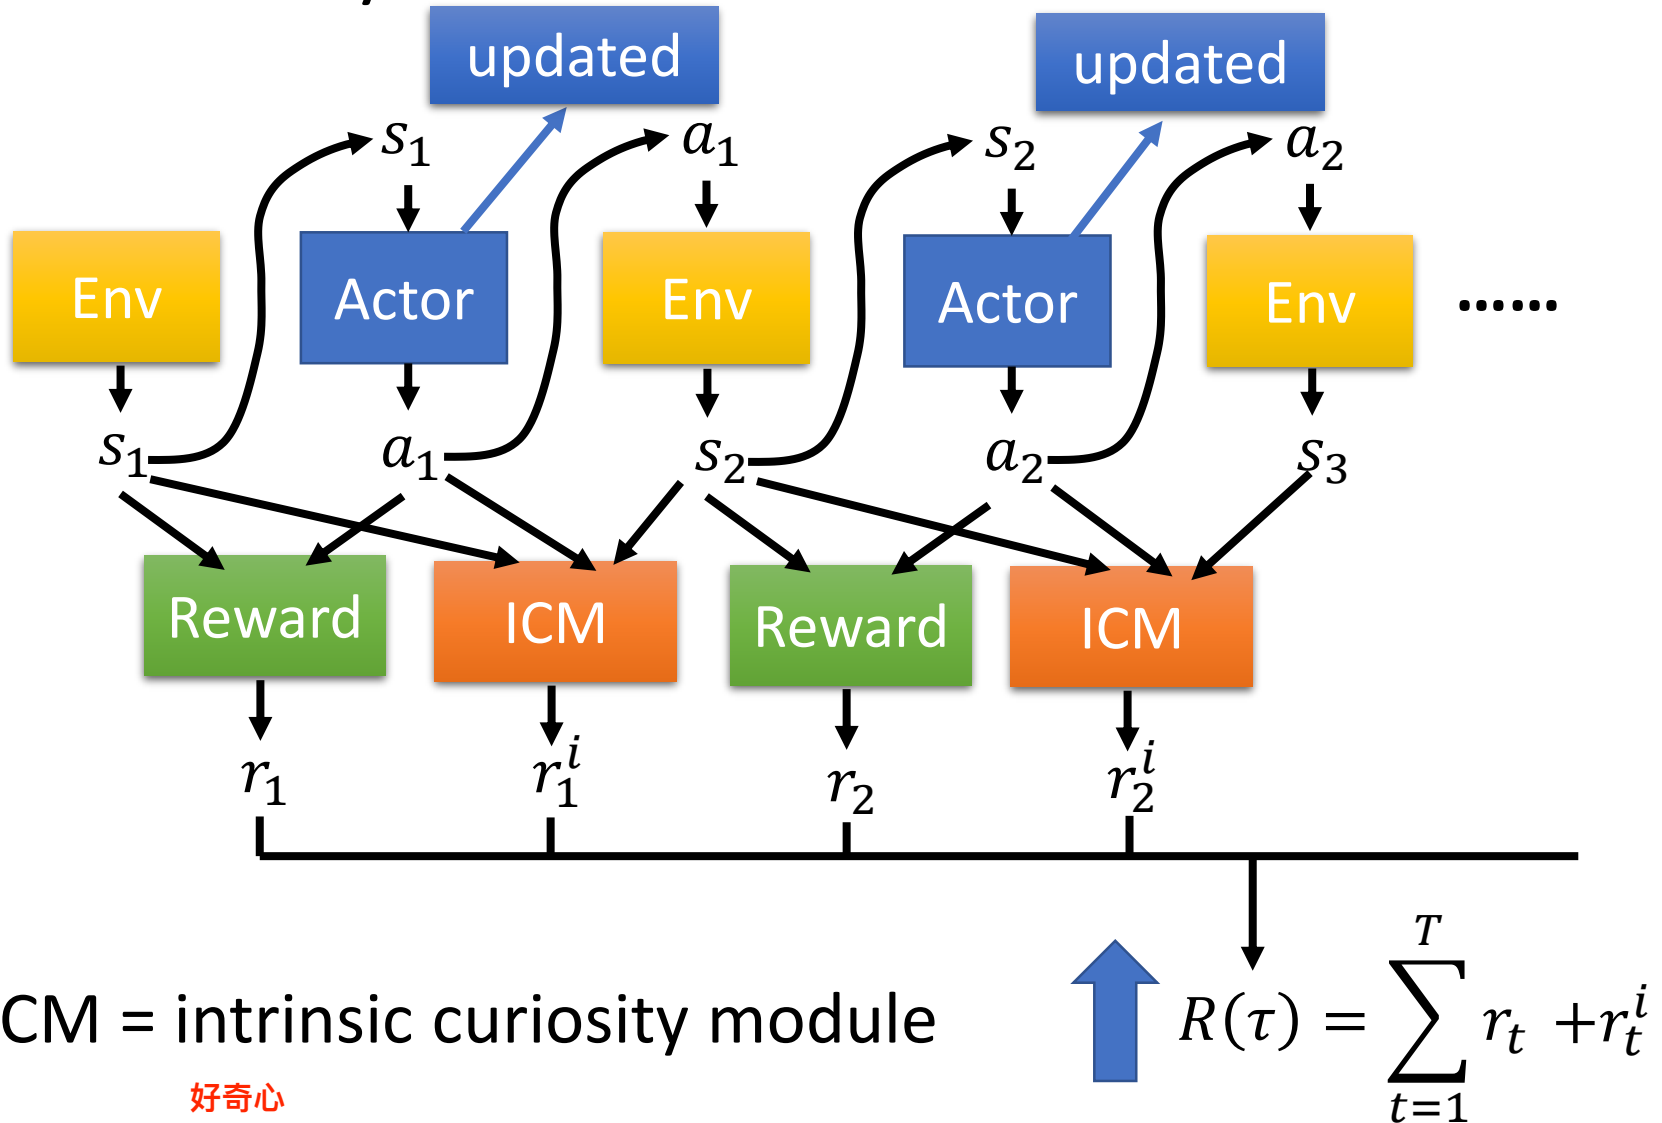

# Reward from Auxiliary Task

# Demo

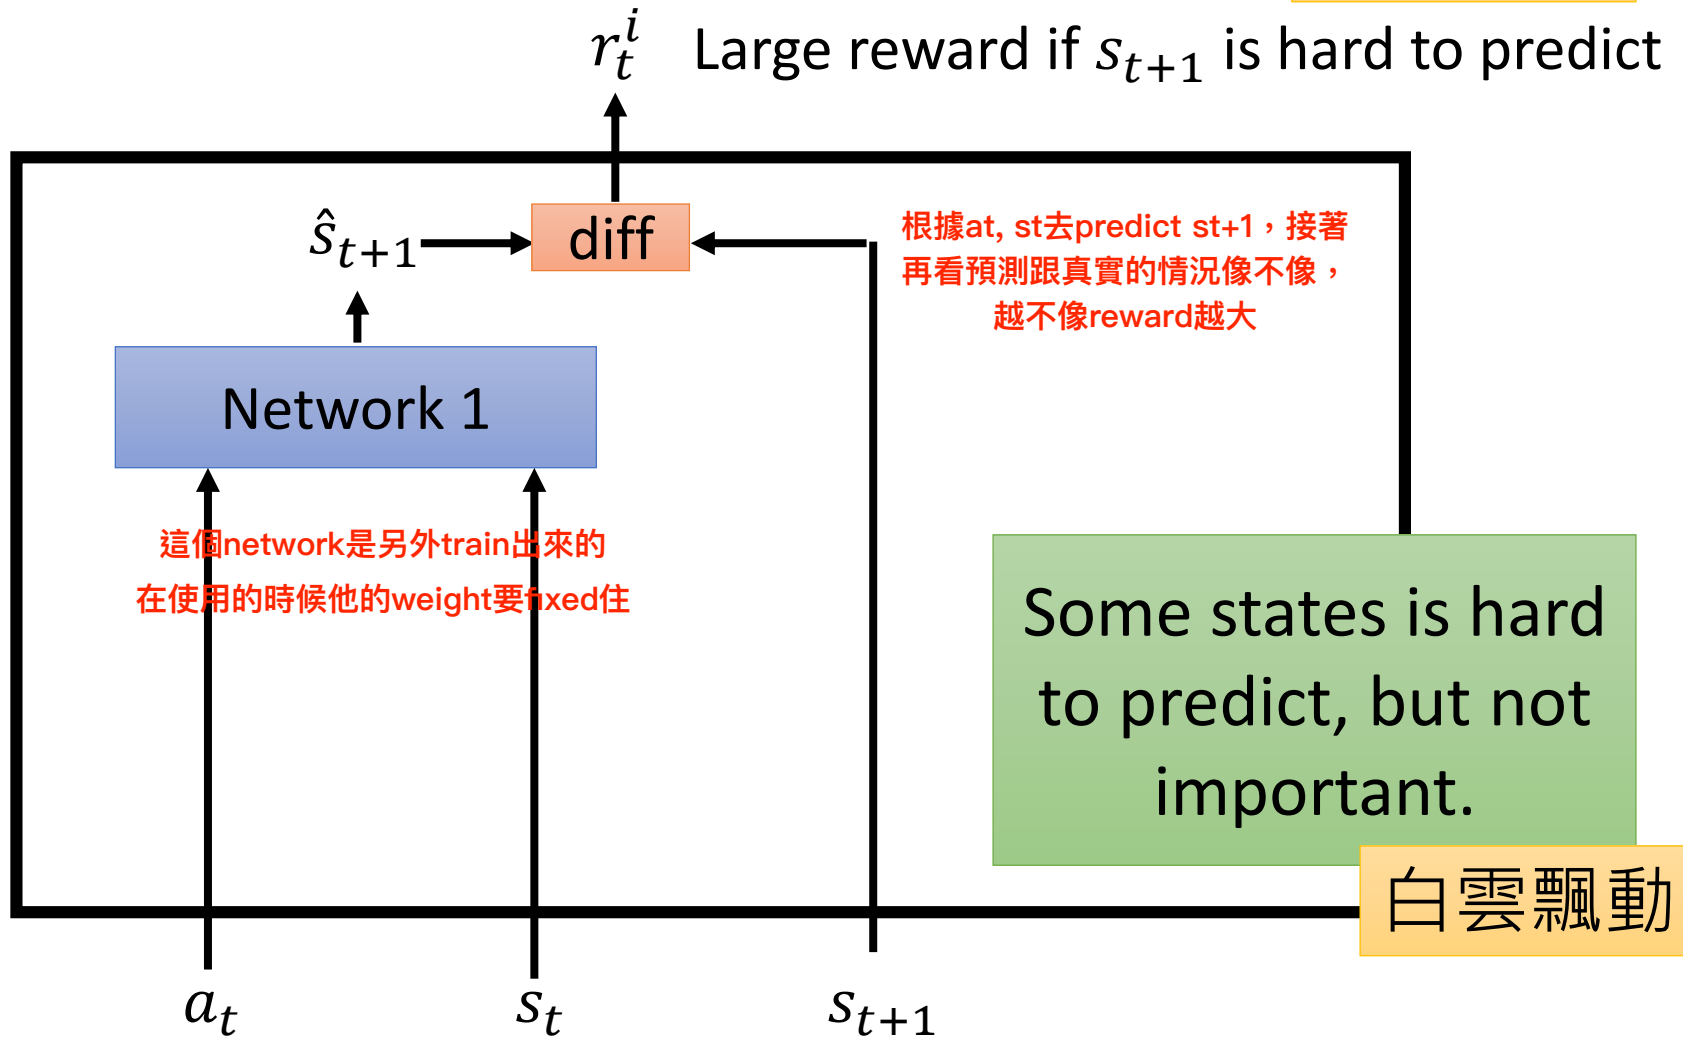

# Curiosity

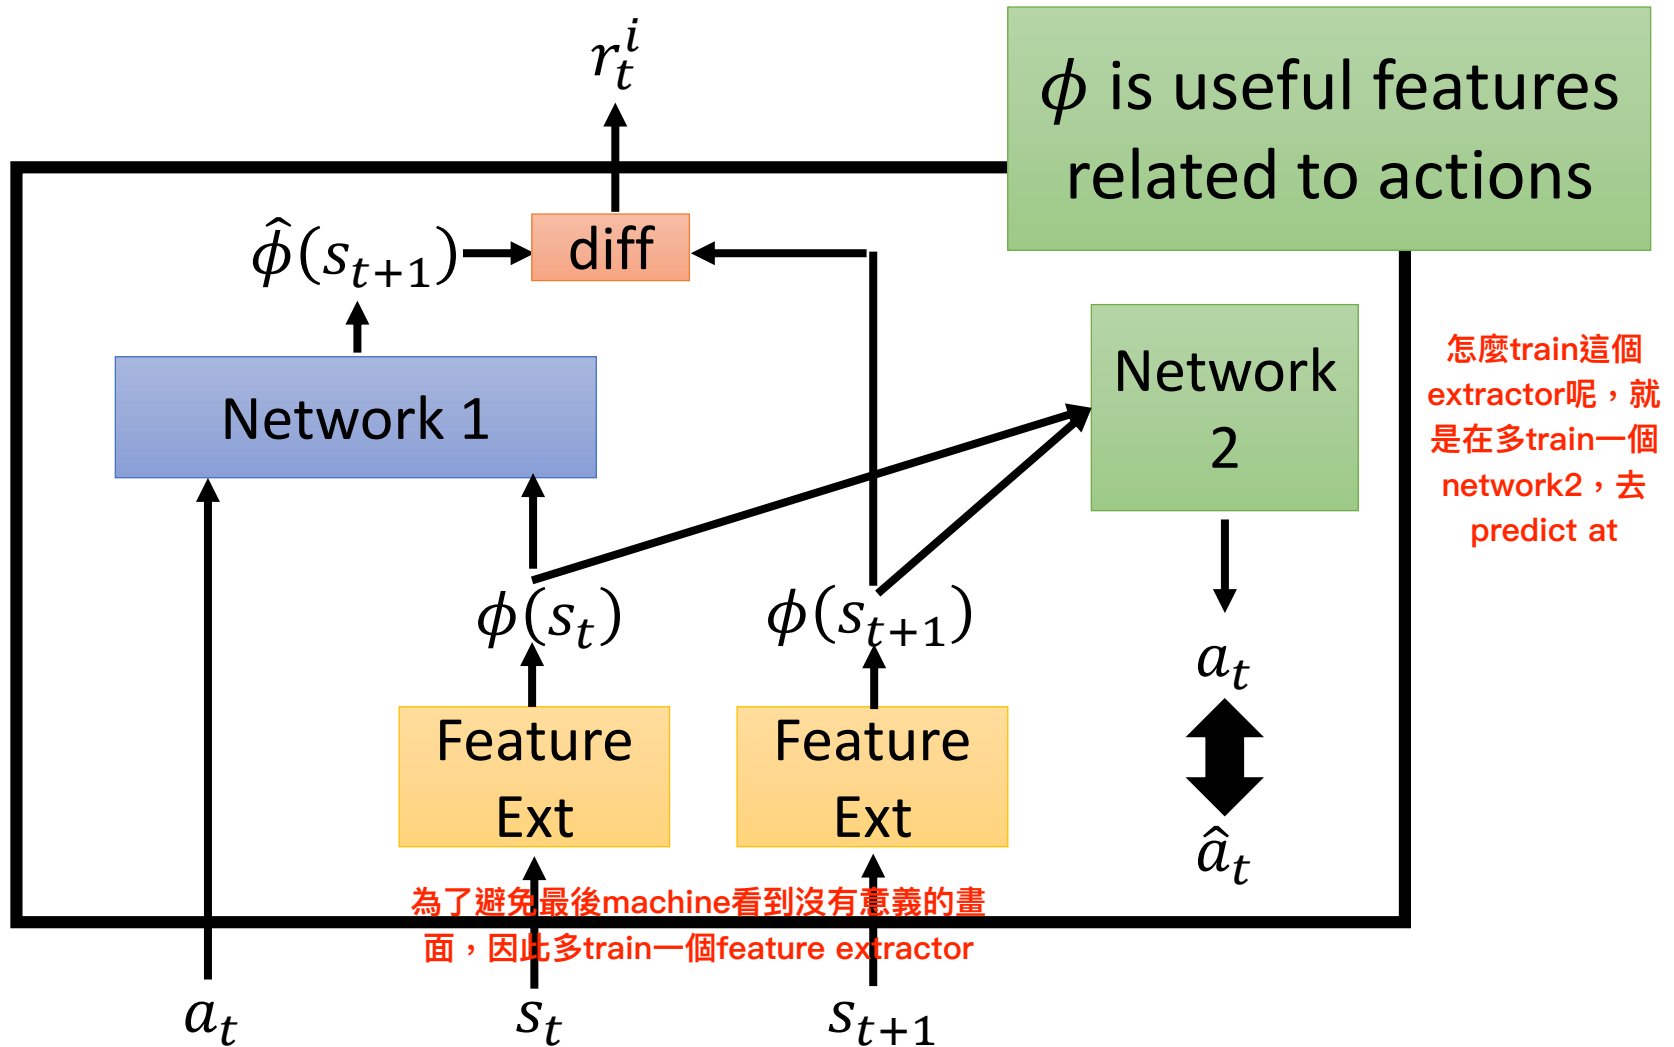

# Intrinsic Curiosity Module

鼓勵冒險

# Intrinsic Curiosity Module

# Sparse Reward

## Curriculum Learning

不能一次教太難  
從簡單的題目交到難的題目

對data做處理（簡單到難）

# Curriculum Learning

- Starting from simple training examples, and then becoming harder and harder.

幫機器規劃一下課程

	Class 0	Class 1	Class 2	Class 3	Class 4	Class 5	Class 6	Class 7
Speed	0.2	0.2	0.4	0.4	0.6	0.8	0.8	1.0
Health	40	40	40	60	60	60	80	100

# Reverse Curriculum Generation

- Given a goal state  $s_g$ .
- Sample some states  $s_1$  “close” to  $s_g$
- Start from states  $s_1$ , each trajectory has reward  $R(s_1)$

# Reverse Curriculum Generation

- Delete  $s_1$  who reward is too large (already learned) or too small (too difficult at this moment)
- Sample  $s_2$  from  $s_1$ , start from  $s_2$

# Sparse Reward

階層式的reinforcement learning

## Hierarchical Reinforcement Learning

對network做處理
